Adding TruFleet Plus Interface to Scout Console

Table of contents

Table of contents	1
Prerequisites	2
Setup Instructions	2
1. Prepare the TruFleet Screen	2
2. Add an Action Button to Your Existing Screen	3
3. Deploy via Scout Central Distributor	3
Troubleshooting Tips	3

Prerequisites

- Administrative access to Scout Manager
- IP address or DNS name of your TruFleet Plus Server
- A working Scout Central Distributor for deployment

Setup Instructions

1. Prepare the TruFleet Screen

1. Enable edit mode
Click the lock icon in Scout Manager to unlock configuration changes.
2. Open the Configuration tab
The Configuration tab is pinned to the left side of Scout Manager. Click it to reveal Consoles and Screens.
3. Create the TruFleet screen
 - Under **Screens**, right-click and choose **Add New Screen**.
 - Name it something like “TruFleet View” and save.
4. Add the Browser Pro element
 - Expand **Screens** → **TruFleet View** and select it.
 - From the Toolbox, drag **Browser Pro** onto the canvas, sizing it to fill the view.
5. Configure the TruFleet URL
 - With Browser Pro selected, open its Properties.
 - Set **URL** to:

None

```
http://<Your-TruFleet-IP-or-DNS>/
```

- Append any login or path segments if required.
6. Save and exit edit mode
Click the lock icon to lock configuration, then save your project.

2. Add an Action Button to Your Existing Screen

1. Enable edit mode (if not already unlocked)
2. Open the Configuration tab
3. Select your existing console's screen
Under **Screens**, find the screen your users normally see (e.g., "Main View") and select it.
4. Drag in an Action Button
 - From the Toolbox, drag **Action Button** onto the canvas.
 - Position it where you want the TruFleet shortcut to live.
5. Configure the Action Button
 - In its Properties pane, set **Action Type** to **Navigate to Screen**.
 - Choose the "TruFleet View" screen you created.
 - Set the **Caption** to something like "TruFleet."
 - Optionally pick an icon or color for quick recognition.
6. Save and exit edit mode
Lock the configuration and save your project again.

3. Deploy via Scout Central Distributor

1. Open Scout Central Distributor
2. Select the Site or specific Console
3. Click **Deploy** to push your changes live

Your new TruFleet View screen and the Action Button shortcut will now be available on the console.

Troubleshooting Tips

- If clicking the button shows an error:
 - Verify the TruFleet server's IP/DNS is reachable.
 - Double-check the Browser Pro URL for typos.
 - Ensure "TruFleet View" appears under **Screens** and is spelled exactly in the Action Button properties.

- If the button doesn't appear:
 - Confirm you saved and locked edits after adding it.
 - Make sure you deployed the latest configuration via the Distributor.
